

CVINFOSYS featured in Risk Adjustment

Panel at 2007 ICE Conference

Woodland Hills, CA - December 3, 2007 Pam Klugman, VP and COO of Clear Vision Information Systems (CVIS) and Donovan Ayers, CVIS' VP of Regulatory Compliance, will be featured panelists today at the Health Industry Collaboration Effort Annual Conference that convenes at the Hyatt Regency Hotel in San Francisco, on December 3 and 4th. Ms. Klugman and Mr. Ayers will contribute their expertise in the Risk Adjustment Panel Discussion scheduled in the Grand Ballroom from 2:00 pm – 4:00 pm.

They will be joined by Pam Leal, Vice President at Ingenix/UnitedHealthcare, Zachary Gerbarg, MD, CPC, Principal of Eagle Medical Management, Connie Snyder, ICE Team Leadership Co-Chair and Vice President Operations & Compliance HMO California, Brand New Day and Yvonne Sonnenberg, Executive Director of Empire Physicians Medical Group.

“The complexities of risk adjustment require much more than a macro understanding of the factors affecting a member’s HCC weight. Those involved must understand that what may appear to be an insignificant detail, is in reality, the major factor causing their risk scores to fall.” said Ms. Klugman, “ You can have the most robust system for data capture, but at the end of the day, it is what CMS actually reflects for your members that counts. With our tool RevenueMax, and our work with ICE, we empower the provider community to understand the underlying causes of the disparity while we proactively bring them into synch.”

ABOUT HEALTH INDUSTRY COLLABORATION EFFORT, INC. (ICE).

ICE is a volunteer, multi-disciplinary team of providers, health plans, associations, state and federal agencies and accrediting bodies working collaboratively to improve health care regulatory compliance through education of the public. ICE volunteers include interested individuals from across the nation. The annual conference is held in conjunction with the Centers for Medicare & Medicaid Services (CMS).
